EDUCATIONAL HISTORY

NASHVILLE SOFTWARE SCHOOL

Apprentice Software Developer 2019-2020

Full-stack software development boot camp emphasizing modern technologies including Javascript, HTML, CSS, React, C#, ASP.net, SQL Server, and Node.js.

Developed and deployed interactive software utilizing industry best practices and an agile development methodology. Team centered and pair-programming focused sprints to complete increasingly elaborate CRUD applications consuming unique APIs.

CEDARVILLE UNIVERSITY

B.A. in Marketing, 2009

PROFESSIONAL HISTORY

JUNIOR FRONT END DEVELOPER

Nashville Software School | Aug 2019 - Present

6-month apprenticeship program focusing on full-stack development projects in a technical environment that includes: JavaScript, React, HTML5, CSS3, Git, Github, npm, C#, ASP.net, and SQL Server.

- Created single-page applications using both vanilla Javascript and React.
- Consumed external APIs and built out ERDs for data architecture with a REST API via JSON Server.
- Utilized Flexbox, Grid for UX/UI layout & styling.
- Team based projects with agile sprints, pair-programming, issue tracking, stories, and retrospectives.
- Gained experience with source and version control with Git and Github.

SEENASH.COM PRODUCT MANAGER

Tech Startup | Oct 2017 - Current

Founder of a Nashville startup that brought a tourism-focused single page web application from concept to deployment, in partnership with the Nashville Convention and Visitors Corp & www.VisitMusicCity.com.

- Created a first-of-its-kind video mapping platform with both mobile and desktop applications.
- Managed a team of 2 developers through prototyping stages to a deployed MVP.
- UX/UI: product design, wireframing, and application HTML/CSS
- Feature development, product road maps, and sprint planning.
- Facilitated strategic partnerships with the NCVC & Premier Parking.

Technical Environment: HTML / CSS / Javascript / Git-Tools: Angular & Ionic Frameworks / Jira / BitBucket / AWS / Mapbox
