SUMMARY

I'm a design-minded developer with a passion for coding & using technology to create awesome user experiences. I love helping projects go from inception to deployment.

My Story: After living and traveling abroad from 2013-2016, I came home to Nashville with a desire to help people travel smarter through technology. I hired a small team of developers and built my first app prototype, doing all the design, HTML, and CSS. I was hooked, and I knew I had to go back to school to learn front-end and back-end programming languages.

SKILLSET

- Single page application design, prototyping and wireframing.
- HTML5 and CSS3 with Flexbox
- Vanilla JavaScript & React
- Source control with Git, GitHub, and Bitbucket
- Consuming external REST APIs
- Sprint & Story management with Jira
- Mapping: Mapbox API & Leaflet, geocoding
- Material UI & Ant Design
- NPM, Webpack
- C#, ASP.net, SQL Server
- Deployment: Azure, Firebase, AWS.
- Adobe: Xd, Photoshop, Lightroom, Premier Pro, After Effects

DEVELOPMENT PROJECT

FRONT END CAPSTONE: TRIPBLAZR

A React app that allows users to collaboratively create and plan trips anywhere in the world, and then become a "TripBlazr" by publishing them; allowing future travelers to follow in their footsteps.

- Created ERD and data flow with mock API via JSON SERVER.
- Designed layout wireframes with Xd.
- Utilized Mapbox API for custom tiles and geocoding.
- Used React Framework with Material UI.
- Used React Leaflet to manage mapping components.
- Deployed the static app to Azure, and the API to Heroku.

Deployed Demo : <https://tripblazr.azurewebsites.net/>

EXPERIENCE

JUNIOR FULL-STACK DEVELOPER

Nashville Software School | Aug 2019 - Present

6-month apprenticeship program focusing on full-stack development projects in a technical environment that includes: JavaScript, React, HTML5, CSS3, Git, Github, npm, C#, ASP.net, and SQL Server.

- Created single-page applications using both vanilla JavaScript and React.
- Consumed external APIs and built out ERDs for data architecture with a REST API via JSON Server.
- Utilized Flexbox, Grid for UX/UI layout & styling.
- Team based projects with agile sprints, pair-programming, issue tracking, stories, and retrospectives.
- Gained experience with source and version control with Git and GitHub.

Group Projects:

- **Welcome to Nashville:** Collaborative API project in vanilla JS; consumed data from MetroParks, TicketMaster, Eventbrite, and Zomato.
- **NutShell:** Social network project using React; constructed an ERD and built API calls to manage relationships, messages, events, and tasks for our users.

SEENASH.COM FOUNDER / PRODUCT MANAGER

Tech Startup | Oct 2017 - Present

SeeNash.com is a local startup that created a tourism-focused single page web application in partnership with the Nashville Convention and Visitors Corp & www.VisitMusicCity.com. It's goal was to create a way for visitors to discover the best things to see and do in Nashville through video.

- Created a first-of-its-kind video mapping platform, solving the biggest challenge of location-based video content; discoverability based on proximity.
- Established & managed a team of 2 developers through early prototyping stages to releasing a deployed MVP on AWS.
- Obtained initial runway investment, vetted and brought on a CTO as a technical founding partner.
- **UX/UI:** responsible for product design, wireframing, and application HTML/CSS
- Responsible for feature development, product road maps, and sprint planning.
- Facilitated strategic partnerships with the NCVB & Premier Parking for marketing.

Technical Environment: JavaScript / Git / Angular & Ionic Frameworks / Jira / BitBucket / AWS / Mapbox / Google Maps & Places API

FREELANCE DIGITAL MEDIA

www.nathanvogelphotography.com | May 2010 - Oct 2017

Wedding & Event Photography, Videography. Getty / iStock Travel Photographer. Website design. Tools: Photoshop, After Effects, Premiere Pro.

TECHNICAL RECRUITER

Otterbase / AllTech | Aug 2007 - May 2010

Agency recruiter responsible for filling contract, contract-to-hire, and permanent tech positions in Nashville TN.

- Sourcing, interviewing, tech screening, on-boarding.
- Specialized in C#.net positions for local healthcare companies.
- Top Recruiter by placements and revenue in every quarter worked.

EDUCATION

Nashville Software School : Apprentice Software Developer 2019-2020

Cedaville University: B.A. Marketing
